---

I'm a passionate UI/UX and product designer who loves crafting clean, modern, and user-friendly digital experiences. I enjoy turning ideas into interactive designs with tools like Figma, Adobe XD, Photoshop, and Illustrator. Curiosity keeps me learning, and I'm always excited to take on new challenges that help me grow as a designer.

## WORK EXPERIENCE

### Drivixo –Modern Ride-Booking Web Design

Aug 2025
Created a modern, visually striking web interface for Drivixo, balancing a simple, contemporary design with an easy-to-use ride-booking experience, judicious application of real-time tracking graphics, and rigorous brand styling to deliver a professional and dynamic user experience

### Nike Shoes Interactive Product WebPage

Aug 2025
Designed an engaging product showcase with smooth color-change transitions and dynamic animations, allowing users to select colors while experiencing an immersive viewing experience.

### Gamezon E-Commerce web/App Design, and Research

Jul 2025
Designed a clean and user-friendly e-commerce interface for Gamezon. Focused shopping experience with well-organized categories, appealing product pages, and smooth navigation.

### (Cannexa) AI Conversation App

Aug - Sep 2025
"*Cannexa*" is a modern chat messenger app that integrates AI directly into conversations. Instead of using separate AI tools, users can simply tag @AI (e.g., @trip plan) or write a prompt, and Cannexa instantly replies within the chat. This makes planning, discussions, and everyday messaging faster, smarter, and more engaging—all inside one app.

### Webcrafty Crew

07-05-2022
Developed a responsive and visually appealing portfolio website using HTML, CSS and JavaScript to showcase my project and skills.
- Task: Static website making using simple HTML/CSS
- Solo task for static website
- My website is to Showcase your photography showcase portfolio.

### IBM Innovation Camp: Data Science

04 Dec 2021 - 31 Dec 2021
Trained a machine learning model using Python to detect breast cancer from medical data
- Working with python basics
- Task: train Machine with data to detect breast cancer
- Training provided by the IBM mentors.
